

SkyBand Internet Coverage Across The US, Canada, & Caribbean

For Business, Small Office Home Office, or Residential

<p>Skyband satellite networking service provides encrypted, high-speed, two-way satellite broadband connections—without ever using a shared or public line. Skyband is cost-effective, point-to-point networking, that opens up new solutions for modern business communications.</p>	<p>Fast – Broadband network connections that can rival T1, DSL and cable speeds.</p> <p>Secure – Virtual Private Networking that's encrypted, dedicated, and insulated from exterior attack. Safer fully-firewalled Internet access.</p>
<p>Availability is a major attraction of Skyband. Not only is it geographically accessible practically anywhere, but it can be sold and serviced by SkyVista's local partners without being restricted by traditional service areas. For example, a company with many locations can obtain SkyBand for all its locations from a single source local to its headquarters.</p>	<p>Reliable – A private, dedicated broadband network built for data.</p> <p>Regulatory Compliance – Compliant with HIPAA, Sarbanes-Oxley, FFIEC, and other federal mandates.</p>
	<p>Efficient – Skyband eliminates the need for separate protective equipment and services at multiple locations by securing the entire network.</p> <p>Available – A cost-effective option for anyone in the U.S. with a clear view of the southern sky.</p>

Customer Premise Terminal Systems with upstream speeds of .128 to .256 Mbps require the following:

- 1.2 Meter Satellite Dish
- 2 Watt BUC, LNB, Feed Horn
- Surf Beam Modem

Total Equipment Cost * Call for pricing

Customer Premise Terminal Systems with upstream speeds of .384 Mbps or higher require the following:

- 1.2 Meter Satellite Dish
- 4 Watt BUC, LNB, Feed Horn
- Surf Beam Modem

Total Equipment Cost * Call for pricing

Additional dish sizes are available as follows:

- 1.0 Meter Satellite Dish (Residential Only)
- 1.8 Meter Satellite Dish
- 2.4 Meter Satellite Dish

Call for pricing

* Shipping, IFL, Mounts, Install, and taxes not included..

* Dealer provides professional installation, mount, cable, ballast, and grounding to NEC codes

Equipment:

Please choose one of the following

I. Customer Premise Terminal Systems with upstream speeds of 256kbps require the following:

- 1.2 Meter Satellite Dish
- 2 Watt BUC , LNB, Feed Horn
- Surf Beam Modem

TOTAL EQUIPMENT COST* **\$ 999.99**

II. Customer Premise Terminal Systems with upstream speeds of 384kbps or greater require the following:

- 1.2 Meter Satellite Dish
- 4 Watt BUC , LNB, Feed Horn
- Surf Beam Modem

TOTAL EQUIPMENT COST* **\$ 1699.99**

Additional dish sizes are available as follows:

- 1.0 Meter Satellite Dish (Residential Only)
- 1.8 Meter Satellite Dish
- 2.4 Meter Satellite Dish

Call for Pricing

This is a pre- order form. A contract will be presented with a complete pricing quote on the satellite package, needed equipment, installation, taxes and shipping and handling fees. Equipment, installation, taxes, shipping and handling fee will need to be paid for by check, money order or credit card upon signing of contract before order is made.
